

## TABLE OF CONTENTS

VII	The University of Chile
IX	Words of the President
XIV	<b>HYDROCOPPER 2007</b> Organizing Committee
XIV	<b>HYDROCOPPER 2007</b> Advisory Committee
XIV	<b>HYDROCOPPER 2007</b> Technical Committee
XV	<b>HYDROCOPPER 2007</b> Editorial Committee
XVI	<b>HYDROCOPPER 2007</b> Editor's Biographies
XVII	Foreword

---

### Plenary Conferences

3	An Overview of Innovations in Copper Extractive Metallurgy up to the Year 2050 <i>Jorge M. Menacho</i>
17	Progress at Mintek in Heap Bioleaching <i>Petrus Johannes Van Staden</i>
23	Engineering a Bioleaching Hydrometallurgical Plant to Achieve Maximum Microbial Activity. <i>Paul Smithson, Enrique Becerra, Andrés Olea and Danny Castillo</i>
31	The Copperbelt of Africa – A Renaissance in Copper Hydrometallurgy <i>Gary Kordosky</i>
41	Evolution of Copper Solvent Extraction Reagents <i>Ron Swart, Keith Cramer, Osvaldo Castro, Peter Tasker and Ross Forgan</i>

---

### Technical Papers

<b>CHAPTER 01</b> <b>Innovations in The</b> <b>Hydrometallurgical</b> <b>Processing of Copper</b> <b>Ores and Concentrates</b>	51	Start-Up Practices, a Life Experience <i>Fernando Pino</i>
	61	Innovations in the Outokumpu Technology's VSF™ Cu SX Process to Reduce the Total Investment Cost while Maintaining High SX Process Efficiency <i>Hannu Laitala, Pertti Pekkala and Claudio Rodríguez</i>
	67	Technical Feasibility Study to Produce Cathodes in the UHC Carajás Plant by the Hydrometallurgical CESL Route <i>Anderson Omena, José Geraldo, Luiz Lima and Tobias Cabral</i>

- 75 Collecting Ditches Application in the Leaching of Dynamical Heaps of Oxidized Mineral. Salvador Division, CODELCO Chile  
*Fernando Aguiar, Franklin Cortés and Osvaldo Tapia*
- 83 In-Situ Leaching – from Characterization to Management: an Integrated Approach  
*Shlomo Orr and Aberra Getahun*
- 89 Synergetic Effect of Leaching Ore Blends or Minerals Containing Copper Wad and Secondary Sulphides  
*Carlos García, Juan P. Garcés, Claudio Rojas and Gabriel Zárata*

---

**CHAPTER 02**  
**Ore Leaching**  
**Operations**

- 97 Study of the Electrochemical Behavior of Bornite Using a Carbon Paste Electrode  
*Fabiana Arena, Daniela Horta, Heloísa Acciari, Denise Bevilaqua, Assis Benedetti and Osvaldo Garcia*
- 101 Influence of Chalcopyrite Concentration in the Electrochemical Response of Carbon Paste Electrode  
*Daniela Horta, Heloísa Acciari, Denise Bevilaqua, Fabiana Arena, Cecilio Fugivara, Assis Benedetti and Osvaldo Garcia*
- 107 Copper Extraction by Electroleaching of Metallic Sulphides Flotation Concentrates  
*Vânia Mori, Luis G.S. Sobral, Marco Aguiar and Paulo A. Medeiros*
- 115 Kinetic Study of the Leaching at High Pressure of Sulfidized Chalcopyrite  
*Rafael Padilla, Paola Pavez and María C. Ruiz*
- 123 Hydrodynamic Tests and Summary of the Work in the Oxide Leaching Heaps of Hydrometallurgy Head Office of MEL  
*Elias Yuri and Alejandro Olivares*

---

**CHAPTER 03**  
**Bio-hydrometallurgy**  
**and New Process**  
**Developments**

- 135 Copper Extraction by Bioleaching of Flotation Copper Sulphide Concentrates  
*Renata B. Lima, Luis G.S. Sobral, Debora M. Oliveira, Priscila G. Xavier, Judith L.S. Lemos, Gabriella S.F. Pereira, Mariana S. Paula, Selma G.F. Leite and Paulo A. Medeiros*
- 143 Influence of the Carbon and Oxygen Feed Rate in the Bioleaching of a Copper Concentrate with *S. Metallicus*  
*Dina Cautivo and Juan C. Gentina*
- 149 Quebrada Blanca, 12 Years of Bioleaching in Altitude  
*Héctor Yáñez, Gunther Ahlborn and Sergio Ramos*
- 157 16S rDNA Uses to Identify and Quantify the Bacteria in the Bioleaching Process  
*Blanca Escobar, Karina Bustos, Kathleen Holzer and Oriana Salazar*
- 165 History and Development of Aeration in the Leaching Heaps of Cerro Verde  
*Guillermo Velarde and Orlando Bernal*

- CHAPTER 04** 177 Crystallization: Aqueous and Acid Aqueous Electrolyte Solutions  
**Best Practices in** *Sergio Rivera, Ademir Ramírez, Julio Rosales, Arturo Gutiérrez, Nicolás Monsalve,*  
**Solvent Extraction** *Katherine Saldías and Patricio Pinto*  
**and Electrowinning**  
**Processes** 185 Implementation of the Split Circuit™ Concept Into Copper Agitation Leach Plants  
*Andrew Nisbett, Angus Feather and Graeme Miller*
- 191 Formation of the Unstable Emulsions in the Process of Liquid Extraction  
*Igor Polski*
- 199 Large-Scale Copper Sulfate Production as an Alternative to Conventional Processes  
*Luis Araya and Danyer Girón*
- 205 New Procedure to Reduce the Electrolyte Potential at Electrowinning Tankhouse  
*Eduardo Lau, Alberto Cruz, Alexis Soto, Gerardo Fuentes*
- 209 Solid/Liquid Solutions by Using Centrifuges in the Hydro Metallurgical of Production  
 Processes  
*Tore Hartmann and José Corbella*
- 217 Molybdenum Extraction from Acid Solutions of the Smelter-Dust Treatment Plant in  
 Caletones Foundry of CODELCO-Chile, El Teniente Division  
*Claudia Orellana and Andrés Aste*
- 223 Application of Projection Methods in the Supervision of the Operation of Solvent  
 Extraction Plants  
*Luis Bergh, Francisco Barrientos and Gonzalo Muñoz*
- 231 Improving the Performance of Aldoxime Ketoxime Blends  
*Matthew Soderstrom and Mauricio Salamanca*
- 239 Reagent Blend Formulated Upon Copper Solvent Extraction Plant Requirements  
*Hans Hein and Gabriel Araya*
- 247 A Novel Physical Method to Calibrate PLS Flowrate at Industrial Solvent  
 Extraction Plants  
*Yadranka Zivkovic and Jorge Menacho*

- 
- CHAPTER 05** 255 Flow and Transport in Leaching Heaps. Application of the Theory of Multiphase Flow  
**Modelling, Optimization** Through Porous Media  
**and Automatic Control** *Emilio Cariaga, Fernando Concha and Mauricio Sepúlveda*  
**of Hydrometallurgical**  
**Processes** 263 Modelling of Bacterial Leaching in Heaps with Forced Aeration  
*Oscar Reyes, Joaquín Martínez and Luis Moreno*
- 269 A Novel Method to Optimize Crushing Circuits at Heap Leaching Operations  
*Jorge Menacho and Patricio Chávez*
- 275 Mathematical Modelling of the Treatment Process of Acid Mine Drainage with Bacteria  
*Fernando Corvalán, Roxana Fuentes, Marcelo Acuña-Goycolea and Carlos Zambra*

<b>CHAPTER 06</b>	283	Biosorption of Heavy Metals on Chitosan <i>Martha Benavente, Anna Sjören, Robin Westergren, Joaquín Martínez and Luis Moreno</i>
<b>Environmental Issues</b>	291	Precipitation of Hematite from Sulfate Media <i>María C. Ruiz, Daniel Castillo and Rafael Padilla</i>
	299	Stainless Steel and the Water Treatment <i>Nelson Ortega</i>
	303	Oxidation of As(III) and Precipitation of Scorodite in Bioleaching Solutions at 30°C and 70°C <i>Magda Mateo, Fernando Acevedo, Blanca Escobar and Jacques Wiertz</i>
	311	Improving the Environmental Conditions in Copper Electrowinning Process Plants in a Profitable Way <i>Tiina Vainio, José L. Loyola and Tirso Meneses</i>
	317	Sulphide and Ion Exchange Technologies for Metal Recovery and Water Treatment in the Copper Mining Industry <i>Rick Lawrence, Raymond Philippe and Chris Fleming</i>
	327	Synthesis, Properties, Environmental and Hydrometallurgical Applications of Nanomaterials: State of the Art <i>Miguel Herrera</i>
	339	AMEC Mine Water Treatment Industrial Plants <i>Tom Higgs</i>
<hr/>		
<b>CHAPTER 07</b>	349	Molybdenum: New by Product at Hydrometallurgical Operations in CODELCO North? <i>Alberto Cruz and Andrés Reghezza</i>
<b>New Projects and Expansions</b>	357	What will Happens in the Copper Recovery Process when a New Generation of Copper Ore gets Into Mining Programs? <i>Sergio Rivera, Ademir Ramírez, Julio Rosales, Arturo Gutiérrez, Nicolás Monsalve, Katherine Saldías and Patricio Pinto</i>
	369	Operational Quality Costs Applied to Hydrometallurgical Processes <i>Ignacio Muñoz and Jesús M. Casas</i>
	375	Review of Current Recovery of Valuable Metals from Electronic Wastes <i>Jocelyn Osorio, María A. Maldini, Marcela Mella and Miguel Herrera</i>
	389	Study for Valuable Metals Recovery from Printed Circuit Boards <i>Marcela Mella, Jocelyn Osorio, María A. Maldini and Miguel Herrera</i>
	399	A Novel Sustainable Process for Anodic Slime Purification <i>Enrique Román, Ronald Alvarez, Jaime Guzmán, Víctor Carrasco and Marcos Cifuentes</i>
<hr/>
