PLENARY CONFERENCES

The Recovery of Metal from Leach Solutions by Synergistic Solvent Extraction.

Chu Yong Cheng, Wensheng Zhang and Davood Moradkhani

Continuous Hydrometallurgical Purification Process of Molybdenum Concentrates: Lead Extraction by Chelating Reagents.

Enrique Román; Sergio Rivera, Viviana Ramos, Andrés Reghezza, Ramón del Río and Agustín Sepúlveda

New Developments in Hydrometallurgical Performance Management: Heap Leaching, Solvent Extraction and Electrowinning Plants.

Oswaldo Bascur, Roberto Linares and Luis Yacher

Breaking Paradigms in Heap Leaching Processes.

Jorge Menacho, Leopoldo Gutiérrez and Patricio Chávez

TECHNICAL PAPERS

1. INNOVATIONS IN THE PROCESSING OF GOLD AND SILVER

Cyanidation of Gold and Silver in Cía. Minera Ares S.A.C.

Eloy Román

Advances in Commercial Bioleaching of Gold and Copper Concentrates.

Paul Miller

Automatic Gold Process Mineralogy with The “Gold-Detect” Image Analysis System.

Peter Siegel and Eliana Almendras

Gold Heap Leach Process Simulator: a Tool for Process Optimization.

Jim Gebhardt, Angélica Hernández, D. McBride and M. Cross

A New Leaching Technology for the Treatment of Gold Ores Containing a High Concentration of Silver.

Guy Deschênes, Mike Fulton, Hai Guo, Judith Price and Chen Xia

2. INNOVATIONS IN SOLVENT EXTRACTION PROCESSES

Recovery of Uranium by Solvent Extraction with Alamine® 336.

Michael Virnig, Jurgen Picardo, Phillip Crane and Hans Hein

Introduction of Ionic Substances as Target-Specific Extraction Agents for Recovering Copper from the Effluents of the Mining Industry.

Roland Kalb, Michael Kotschan and Alberto Bezama

Co-Matrix™ Filters – Results of the Pilot Plant and its Applications in the Solvent Extraction Plants.

Carlos Jiménez, David Minson and Jason Gilmour

The Solvent Extraction Separation of Molybdenum and Copper from Acid Leach Residual Solution of Chilean Molybdenite Concentrate.

Fernando Valenzuela, Juan Andrade, Jaime Sapag, Christian Tapia and Carlos Basualto

Extreme Situations of Emulsions Separation in the Copper Solvent Extraction Plants.

Igor Polski. IGAL Tecnología Ltda

3. HYDROPROCESS DEVELOPMENTS AND PERSPECTIVES

Copper Uses from Starting Sheets, Selling as final Product of Copper Electrolytic Sheets “LEC”.

Claudia Orellana and Francisco Hormazábal

Molybdenum Concentrates Processing: Challenges and Opportunities to Production of Fine Compounds.

Jesús M. Casas and Bárbara Morchio

Latest Developments in Sulphuric Acid Plants Based on Metallurgical Off-Gases.

Hannes Storch

Hydrocopper® – Moving up in the Copper Production Chain.

Liisa Haavanlammi, Janne Karonen and Claudio Rodríguez

Tailor Made Wetting Agents for Heap Leaching Processes.

Hans Seelmann, Cesar Ostos, Arturo Berastain, Ricardo López and Mauricio Rocha

4. INNOVATIONS IN LEACHING PROCESSES

Removal and Treatment Methodology of Tailings Deposited in Dams.

José Araneda, Nélica Heresi, Iván Rayo and Juan Rayo

Changes in the Management of the Processes in Cerro Verde.

Guillermo Velarde and Orlando Bernal

Leaching of Copper Sulfide Ore in NaCl-H₂SO₄-O₂ Medium with Acid Pre-Treatment.

Osvaldo Herreros, Roberto Quiroz and Joan Viñals

Method to Design the Surface Area of the Heap Leaching Pad Maintaining the Balance with the SX-EW Stages.

José Avila

Leaching of Chalcopyrite Concentrates in Acid Ferric Sulfate Media at Controlled Redox Potentials.

Berny Rivera, Gonzalo Viramontes and David Dixon

4. TECHNICAL APPLICATIONS AND OPERATING PRACTICES

Remining of Leaching Heaps in Magistral Mine of Compañía Minera Pangea, S.A. de C.V.

Rafael Sánchez and Joe Milbourne

Welding Failures in the Stainless Steel Cathodes for Electrowinning.

Antonio Pagliero, Froilán Vergara and José García

Methodology for the Determination of Corrosion Rate in Lead Anodes.

Antonio Pagliero, Froilán Vergara and José García

Acid Mist and Noise Control in the Electrowinning Tankhouse.

Rudi Fester and Fernando Romero

New Practices to Desludge the Electrowinning Cells without the Utilization of the Short-Circuit Frame.

Mario Núñez and Nelson Salazar

6. INNOVATIONS IN THE TREATMENT OF SMELTER DUSTS

Recovery of Copper from Smelter Dust Stabilizing and Confining Arsenic.

Miguel Monroy, Félix Arancibia, Ricardo Vergara, Claudio Loyola and Yuri Zepeda

Hydrometallurgical Processing of Smelter Dust and Inertization of Cadmium in the Precipitates of Arsenic in Codelco Chile - Division El Teniente.

Claudia Orellana and Francisco Hormazábal

Study for Removal of Toxic Elements Bearing Dusts of Copper Smelter in Chile: Review.

Jocelyn Osorio, Angélica Maldini, Marcela Mella and Miguel Herrera

Diagnosis of Current Situation of Smelter Flue Dust in the Chilean Copper Mining Industries.

Angélica Maldini, Jocelyn Osorio, Marcela Mella and Miguel Herrera

Arsenic Immobilization of Teniente Furnace Dust.

Hironori Tateiwa, Ryoji Ichimura, Miguel Herrera and Gerardo Sánchez

7. MODELING, SIMULATION AND CONTROL OF HYDROMETALLURGICAL PROCESSES

Modelling of Leaching of Copper Oxides in Dumps and in-Situ.

Joan Mahiques, Joaquín Martínez and Luis Moreno

Model of Heap Leaching in 2 Dimensions: Effect of Hydraulic Conductivity on Copper Recovery.

Miguel Carrasco, Felipe Lagno, Paulina Ruiz and Marco Nehgme

Simulation of Hydrometallurgical Process in Reactors by the Process Simulator LIMN[®].

Luis La Torre, Adam Johnston and César Fuentes

Control Project of a Copper Solvent Extraction Pilot Plant.

Luis Bergh, Erich Lucic and Frank Zuleta

RTP™ Platform of Integration in the North Division of Codelco-Chile.

Leonel Mundaca

8. INNOVATIONS IN BIO-PROCESSES

Geobiotics' Technologies: New Tools to Process Low Grade Primary Ores.

Enrique Carretero and Todd Harvey

Bioleaching of Chalcopyrite Concentrate with *S. Metallicus* at High Pulp Densities.

Dina Cautivo, Carolina Astudillo, Fernando Acevedo and Juan C. Gentina

Bioleaching of Chalcopyrite Concentrates as Alternative to Make use the Capacity of the Plant LIX-SX-EW LESDE Toquepala”.

Jaime Arana, Joe Pezo, Franz Cárdenas and Jesús Escate

Heavy Metals Precipitation using Sulfate Reducing Bacteria in Liquid and Soil Medium.

May-Lin Almendras, Marta Carballa, R. Van Hille, S. Harrison and Rolando Chamy

Developments and New Applications for Biogenic Sulphide Reagent in Hydrometallurgy and Mineral Processing.

Rick Lawrence and P. Brad Marchant

9. TREATMENT OF METALLURGICAL BY-PRODUCTS AND WASTES

Precipitation of Enriched Arsenic Residues from Diluted Industrial Solutions.

Michelle Caetano, Cláudia Lima, Sonia Rocha and Virginia Ciminelli

Crystallization of Arsenic Salts.

María E. Taboada and Teófilo Graber

State-of-the-Art Management Technologies for Contaminated Soils and Groundwaters with Focus on the Copper Industry.

Alberto Bezama and Mario Sánchez

New Developments in Treatment of Mining Effluents with Hydrogen Peroxide and Caro's Acid.

Luiz Teixeira and Cristian Marquez

10. INNOVATIONS IN ELECTROWINNING PROCESSES

Multivariable Modelling for the Cathodic Quality in C.M. Doña Inés de Collahuasi SCM.

Fernando Romero, Guillermo Ávila, Rudi Fester and Luis Yacher

Special Cathodes Production at High Current Density.

Marcelo Bustos and Egidio Saldivar

Cobalt Sulphate Effect on Manganese and Lead Compounds Formed on the Surface of the Pb-Ca-Sn Anodes in Acid Electrolytes.

Jorge Ipinza, Juan P. Ibáñez, Antonio Pagliero and Froilán Vergara

Fluid Dynamics Simulation of a Conventional Electrolytic Cell of Copper.

Carmen Herrera, Gerardo Cifuentes and Nelson Moraga

Considerations on the Bleeding of Electrowining Tankhouse.

Rudi Fester, Carlos García, Fernando Romero and Richard Dixon
