

TABLE OF CONTENTS

| | | |
|---|------|--|
| | VII | Chairman's Address |
| | X | Preface |
| | XI | Acknowledgements |
| | XII | Organising Committee |
| | XII | Advisory Committee |
| | XIII | Technical Committee |
| | XIII | Editorial Committee |
| | XV | Organisers |
| CHAPTER 01 MANAGEMENT & BEST PRACTICES | 3 | Project Execution and Escalation in a Heated Metals Market <i>Kenneth THOMAS</i> |
| | 11 | Best Operating Practices at Sossego the Processing Plant: Reducing, Reusing and Recycling <i>Bruno FERRAZ, Mauricio BERGERMANN and Fabiano MALTA</i> |
| | 21 | How to Beat Scarcity in Human Resources <i>Hans DE RUITER and Wijnand DALMIJN</i> |
| | 29 | Engineering Design of Concentrators in Australia, Asia and Africa – What Drives the Capital Cost? <i>Greg LANE, Paul STAPLES, Mal DICKIE and John FLEAY</i> |
| | 41 | Process Plant Design & Layout – Art or Technology? <i>David HARRON and Jorge ROSAS</i> |
| CHAPTER 02 CRUSHING & GRINDING | 55 | Direct vs. Reverse Grinding Circuit Configurations: A Quantitative Assessment of their Relative Operational Performance <i>Jaime SEPÚLVEDA</i> |
| | 61 | Purchase and Renovation of a used Ball Mill <i>Michael NELSON and Michael HOLDEN</i> |
| | 71 | New Developments in Cone Crusher Performance Optimization <i>Jens LICHTER, King LIM, Alex POTAPOV and Dean KAJA</i> |
| | 81 | Testwork Programs that Deliver Multiple Data Sets of Comminution Parameters for use in Mine Planning and Project Engineering <i>Derek BARRATT and Alex DOLL</i> |
| | 97 | Energy Efficiencies from Isamilling in a Concentrate Regrind Duty <i>Leonardo SOTO and Cecilia ARRUE</i> |

- 107 Grinding Chemistry – The Effects of Grinding Environment on the Flotation Response of Copper Ores
Christopher GREET and Jessica KINAL
- 119 Ball Mill Circuit Models for Improving Plant Performance
Robert McIVOR
- CHAPTER 03**
HIGH PRESSURE
GRINDING ROLLS
- 129 Analyses of the Total Required Energy for Comminution of Hard Ores in SAG Mill and HPGR Circuits
Persio ROSARIO and Robert HALL
- 139 Plant Layout Considerations for High Pressure Grinding Rolls
Chris MORLEY
- 151 Summary of Research Outcomes of the P9N HPGR Project, Incorporating Mineralogical Analysis, Particle Weakening and Micro Cracked HPGR Products
Michael DANIEL
- 165 A Small-Scale Test to Determine a Work Index for High Pressure Grinding Rolls
Dave BULLED, Khiratt HUSAIN and Carlos LOZANO
- 175 High Pressure Grinding; How High Can You Go?
Frank Peter VAN DER MEER and Rüdiger DICKE
- CHAPTER 04**
FLOTATION
- 189 Molybdenum Recovery Evolution at Codelco Chile, El Teniente Division
Rolando MORALES, Patricio GIMÉNEZ, Marco ARRU and Jean AUTHIEVRE
- 197 Factors Affecting Froth Stability in Mineral Flotation and Implications on Minerals Recovery: A Case of Study
Massimiliano ZANIN, Sabina GREDELJ and Stephen GRANO
- 207 Frother Effect on Bubble Coalescence and Break-Up
Willy KRACHT, César GÓMEZ and James FINCH
- 215 Implementation of Rougher Flotation Control System at Codelco Chile – Andina Division
Arturo BARRÍA and Mauricio VALDEBENITO
- 221 Molybdenite Differential Flotation Process Via Desliming in Order to Split Ultrafine Insoluble Minerals
Jorge TAPIA
- CHAPTER 05**
PROCESS DEVELOPMENT
& DESIGN
- 229 The Recovery of Metals from the Stora Sahavaara and Hannukainen Iron Oxide Copper Gold (IOCG) Resources
Dominique LASCELLES, André MCKEN, Guillaume CHIASSON, Paul MARSDEN, Lawrence HOOEY, Alan DIXON and Karl HOUSELEY
- 241 San Cristobal Project Start Up and Operational Statistics Analysis
Juan COLLAO

- 251 Flash Flotation - from Pilot to Full Size Installation at Esperanza
Pertti LAMBERG and Luis BERNAL
- 257 Application of High Frequency Screens in Closing Grinding Circuits
Laércio ALBUQUERQUE, Jobe WHEELER, Steven VALINE, Brenno GANAHL and Godofredo BARRIOS
- 265 Predicting the Overall Specific Energy Requirements of AG/SAG, Ball Mill and HPGR Circuits on the Basis of Small-Scale Laboratory Ore Characterisation Tests.
Stephen MORRELL
- 277 A Treatment Capacity Model: the Approach Developed by Compañía Minera Doña Inés de Collahuasi SCM
Oscar ALRUIZ, Jorge CAMACHO, Constantino SUAZO, Orlando ROJAS and Alejandro HOFMANN
- CHAPTER 06** 303 Process Integration and Optimisation at Freeport -
PROCESS CONTROL & McMoRan Candelaria Mine, Copiapó, Chile
OPTIMIZATION *Alfonso MUÑOZ, Luis ÁLVAREZ, Juliana COLACIOPPO and Walter VALERY*
- 317 Control of Flotation Process
Jari MOILANEN and Antti REMES
- 327 Rougher Flotation Multivariable Predictive Control; Concentrator A-1 Division Codelco Norte
Guillermo CORTÉS, Mauricio VERDUGO, René FUENZALIDA, Jaime CERDA and Eduardo CUBILLOS
- 339 Advanced Process Control of a Froth Flotation Circuit
Sebastian GAULOCHER, Eduardo GALLESTEY and Henrik LINDVALL
- 351 Calibration Methodology and Calibration Maintenance in Courier Analyzers for Copper-Molibdene Flotation Process
César GARRIDO, Héctor TOLEDO, Pablo SAN MARTÍN and Adrián VILLANUEVA
- 359 Advanced Control Implementation in the SAG Grinding Plant, Anglo American Chile, Los Bronces Division
Mauricio MOGLIA and Víctor GRUNWALD
- 369 On-Site Use of Hydrodynamic Sensors to Improve Metallurgical Performance of Flotation Machines
Gianni BARTOLACCI, Mohamed OURRIBAN, Ahmed BOUAJILA, César GÓMEZ, James FINCH and Ghislain GOYETTE
- 379 Combining On-Line Process Measurements and Models for Monitoring, Diagnosis and Control of Flotation Columns
Luis BERGH and Juan YANATOS

| | | |
|--|-----|---|
| CHAPTER 07 PROCESS MODELLING | 391 | Design, Simulation and Optimisation of SAG Mill Circuit Using the JKSimMet Simulator <i>Sebastián URREJOLA, Cristian RODRÍGUEZ and Thomas BOBO</i> |
| | 401 | On-Line Estimation of Bubble Size Distributions Using Gaussian Mixture Models <i>Miguel MALDONADO, André DESBIENS, René DEL VILLAR, Helin GIRGIN and César GÓMEZ</i> |
| | 411 | The Use of DEM Modelling for the Development of the SAG Mill Liners at Minera Los Pelambres <i>Alexander ORTIZ and Jens LICHTER</i> |
| CHAPTER 08 EQUIPMENT DESIGN | 431 | Development and Validation of the TankCell-300 <i>Sami GRÖNSTRAND and Peter BOURKE</i> |
| | 441 | Wear and Design Improvements in Discharge Cones for Large SAG/AG Mills <i>Craig FAULKNER and Paul GRIFFIN</i> |
| | 451 | G-CELL Pneumatic Flotation Technology, Fines Particle Applications, Imhoflot Technology <i>Samuel SÁNCHEZ, Alejandro SÁNCHEZ and Rainer IMHOF</i> |
| CHAPTER 09 TAILINGS HANDLING & THICKENING | 465 | The Secret to Thickener Performance <i>Richard TRIGLAVCANIN</i> |
| | 477 | Experiences with Modern Dewatering Technologies in Fine Iron Ore Application <i>Guido GÖRRES, Rolf HINDSTRÖM and Manuel MARTÍNEZ</i> |
